

Hello, Lucia.

Welcome to Virtuous.
A place for wisdom, meals
and words worth keeping.

Start here

<https://jkgbafa.github.io/>

- 1 Open in Chrome**
Use the link above on your Galaxy. No password needed. Avoid Incognito so your personal saves stay with this browser.
- 2 Add it to your home screen**
Chrome menu (three dots) → **Install app**. Some versions say **Install and create shortcut** → **Install**. Follow the prompt.
- 3 Make yourself at home**
Open the Virtuous icon, enjoy the floating V, then tap **Enter Virtuous** beneath today's quote. Settings is the gear icon.

A lovely place to begin

Read today's thought, play a love note, or ask about a message. Opening the app each day keeps your streak going.

Wisdom. Food. A little love.

Let's talk

Ask about the messages and books in your collection—or ask a question about life, faith or marriage. Virtuous looks for relevant passages from Bishop Joshua (BJosh), Bishop Dag, Aunty Maame, First Love Conversations and your sessions with Mother Luka.

“Is there a message where BJosh talks about balancing my life?”

“What does Aunty Maame teach about communication?”

“Recommend another message I can listen to about this.”

Tap a source to read the fuller passage. **Listen from this moment** opens a message at the available timestamp. Books show their title and chapter. Continue the conversation or tap **History** to return to past chats. AI and automatic transcripts can make mistakes; check the source when a detail matters.

Food, made simpler

Recipes: open a dish for measured ingredients and steps. Use its add-to-plan button, choose the meal and days, then confirm.

Plan: tap a day's breakfast, lunch or dinner to choose a recipe. Repeat it on selected days or all week.

Shopping: set your budget in cedis, build your list and log market prices. Scan a product label or price photo, then check the recognised text before saving.

Reels: in Instagram, Share → Virtuous if it appears after installation. Otherwise Copy link, then **Food** → **Reels** → **Save link**. Your link is kept for later; automatic video-to-recipe extraction is not available yet.

For you

Browse Q&As, love notes and marriage counselling. Play a recording and follow the highlighted words; tap a word or chapter to jump.

Bring it to your home screen.

One daily notification

In **Settings** → **A daily moment**:

- 1 Enable on this phone**
Tap **Enable on this phone**, then **Allow** in the permission prompt.
- 2 Choose your time**
Set the time (Ghana time), keep **Daily reminders enabled** on and tap **Save preferences**.
Discreet preview hides the quote on the lock screen.
- 3 Send a test**
Tap **Send a test**. Swipe down: look for **You're all set**. You can close the app; you don't need to leave it open.

Nothing arrived? Check Chrome's site permissions and Galaxy Settings → Notifications → App notifications (Chrome / Virtuous). Check Do Not Disturb and Power saving. Reconnect and try again; delivery can be delayed.

Your daily-quote widget · optional

The home-screen quote needs a small, separate Android companion. Installing the web app alone does not add a widget.

- In Virtuous Settings, tap **Download Android widget** and install the trusted APK. It is outside the Play Store.
- Back in Settings, tap **Create widget pairing token** → **Copy widget token**.
- Open **Virtuous Widget**. Keep the prefilled server address, paste the token and tap **Pair my widget**.
- Tap **Add**. Or long-press an empty home-screen space → **Widgets** → **Virtuous Widget** → **Add**. Resize by holding the widget.

If Samsung blocks the APK, ask Joshua to help or simply skip the widget—notifications still work. Don't disable security protections just to follow this guide. Widget refresh can be delayed by battery saving; its quote is visible to anyone seeing your home screen.
